

Notes

- “Future Systems” are included for informational purposes and will not be active at system launch or during the initial contract period.
- “Customer data” is refreshed and will be exported from SDCP’s systems weekly.
- “Interval data” is refreshed on a rolling T+33 day cycle and can be made available if needed for proposed solution.
- Weather data is currently provided through SDCP’s short term forecast vendor and will be unavailable during the initial contract period. Bidders should provide an alternative source if needed for their proposed solution.
